

Driver System Operator

The Driver System Operator (DSO) applies petroleum related technical knowledge to perform complex tasks associated with performing aircraft and ground fuel servicing operations (refuel/defuel) by mobile fuel servicing trucks. They must be able to refuel, defuel and provide on-station fuel services to aircraft and support equipment by mobile fuel servicing vehicles. They will conduct daily, weekly, monthly, and recurring operator inspections and perform minor operator maintenance on all assigned refueling vehicles.

Type	Pay	Location
Full-Time, Part-Time	Hourly	TBD

Primary Responsibilities:

- Conducts cold servicing operations with mobile refueling vehicles as directed by the Dispatch Center and the Fuels Management Team.
 - Performs all petroleum handling and associated duties in strict compliance to governing United States Air Force, Defense Logistics Agency-Energy and Defense Contract Services, Inc. policy/procedural directives.
 - Maintains technical competency in USAF and Performance Work Statement (PWS) prescribed environmental, safety and performance levels to execute all assigned fuels handling tasks proficiently and safely.
 - Exhibits understanding of technical/safety regulations applicable to aviation and ground fuel servicing operations on and around the airfield and supported areas.
 - Performs operator inspection and maintenance of fuels equipment and vehicles and obtains visual samples to verify fuel quality.
 - Performs general housekeeping duties in common/public work areas and fuels facilities.

Required Qualifications:

- High school diploma or GED
 - Proficiency with computer systems and dispatch software
 - Knowledge of fuel handling, storage, and transportation regulations
 - Valid driver's license
 - Must pass background investigation and security clearance requirements
 - 2 years of relevant work experience
 - CDL with HAZMAT endorsement; licensed to operate all mobile refueling vehicles and general-purpose vehicles.
 - Proficient in Department of Defense or commercial petroleum operations and concepts to include conventional and unconventional aviation fuel servicing.
 - Proficient in petroleum system inspection and maintenance practices and can identify and mitigate potentially hazardous situations.
 - Current and proficient in all operational and safety training associated with hazardous materials, contamination monitors and equipment handling to include the ability to demonstrate safety actions in fuel handling operations.
 - Successfully complete base flightline driving training and obtain a flightline access pass.
 - Must be physically capable of performing all duties including lifting 40+ pounds, climbing fuel tanks up to 40 feet high and climbing on tank trucks.
 - Able to meet pre-employment and random drug/alcohol testing requirements.
 - Must be willing to work flexible duty schedules which may include night shift or weekend duty.
-

Work Conditions & Physical Requirements

- Work is performed in both office environments and on terminal grounds, including outdoor exposure to all weather conditions
 - Must be able to work around petroleum storage tanks, pipelines, and heavy equipment
 - PPE is required in designated areas per safety regulations
 - On-call availability for emergencies, spills, or critical operational events may be required
-
